

# HSF – 1 Handheld Filter Shower

The filter shower can effectively remove residual chlorine and its harmful by-products in the shower, reduce heavy metal, hydrogen sulfide, foam and scale. It keeps nature moisture in skin, scalp and hair.

## Installation Instruction:

1. Separate the connection of the shower hose and bathtub faucet.
2. Turn on the faucet, let the water flow in half minute and wash away impurity in the water hose.
3. Put the included seal rings on the two connecting points of filter shower hose, then connect them with shower and the bathtub faucet. Adjust it until no leakage. (Use sealing tape if necessary.)

## Using Instruction:

1. The filter shower can be reusable while the filter core is disposable. The total water treatment capacity is 10,000 gallons (38,000 liters) which may vary depending on local water quality. Please replace the filter in the after reaching the total water treatment capacity.
2. Every time after 2 weeks of usage, open the filter shower and take out the filter core, shake and wash it several times, make filter core upside down and put it back in the shower.
3. Spin the panel of water nozzle, it appears once:
  - (1) Outer ring Spray
  - (2) Spray and massaging composition
  - (3) Massaging
  - (4) The water bubble soften
